

**a** All sites, VIS10**b** Within proteins, VIS10**c** Within proteins, DIG25

- one cohort; NEG\_B end filled: same-experiment readout (QTRP S1, S2, qPerS-SID, YAP1C)
- NEG\_B end open: observed class not comparable (PAT-switch, Cys-BOOST HeLa, SH-SY5Y)
- ◆ FAT-switch: NEG\_A only (no observed-unmodified class)

NEG\_A: every other cysteine of a protein carrying a site  
 NEG\_B: cysteines the same experiment reported unmodified  
 Bars: 95% cluster-bootstrap intervals; dashed line: AUC 0.5
