

a Negative-set construction

b Background choice

c Attribute definition

How precisely the attribute was stated

quantity and threshold stated
(relative accessible area > 25%)

threshold stated as absolute area
(sulfur SASA > 1.0 Å², as reported)

threshold stated (RSA ≤ 10%, Ala-Cys-Ala);
attribute does not reconstruct

categories stated, assignment tool
not reproducible (DSSP vs P-SEA)

window stated, statistic is a
per-position frequency
